

Features

Primer Uni from FreeForm is a Primer suitable for most applications except on heated surfaces or surfaces from which there is continual rising damp.

- Its features include the facts that it is,
- Water based, solvent free—so safer from health point of view and environment friendly
- Quick drying single component
- Easy to use
- The primer will provide high bonding to the subsequent layer
- Absorbency control—Priming with Primer Uni will provide good absorbency control and reduce chances of drying shrinkage of the top screed and enhance crack control.

It is suitable when a short curing time after application is required. Usually the subsequent construction layer can be applied on the next day of application of the Primer. The surface primed with Primer Uni does not need to be pre-wetted before application of next coat. Single component, Ready to use.

Application

It can be used on

- All traditional concrete screeds and surfaces
- Tiles and stone to enhance adhesion

Do not apply on damp surfaces.

Appearance

Light blue liquid

Specifications

Output/Coverage

~150 gm/m². The yield of the product may vary depending on the porosity of the surface to be treated

Work Time

5–20 minutes

Base Surface Preparation

Always use suitable instruments to check the moisture content in the subfloor. The base must be compact, and free from moisture and loose fragments such as chalk, dust, oil or wax residue.

Application/Installation Method

Stir well to mix the product before use. Ideal temperature for usage is between 15°C to 25°C. Conditions outside of the above range may be workable but setting time may need to be rechecked.

Apply liberally to the base with a roller or brush.

Do not apply in damp environment.

Curing

Film hardening in 24–48 hours depending on use and thickness applied.

Packing

5 kg plastic can

Shelf Life

6 months

Green Certification

This product is GreenPro Certificated and qualifies as Green Product by CII- Green products and services council.
